EQUESTRIAN INNOVATIVE

After designing many patented inventions to improve the safety and well-being of both horses and riders in the stable as well as during transport and jumping, Jean-Luc Fautras now offers you the JUPÉCAP® protection.

- > The skirt and mini-cape fit into the 2 attached cases. Total protection for riding and hiking. The big cape covers completely the torso and arms. It can get put away in a zip pocket in front of the saddle.
- > The set is fitted in front of the saddle, from side to side and is held in place at each extremity by two elastic straps linked to the saddle girth.
- > A slight tension on the elastic straps maintains JUPÉCAP in position without hampering the horse or the rider. (See photo 2)
- > The skirt is installed around the waist without needing to dismount the horse.
- > The skirt and mini-cape are designed in a waterproof material that protects the legs and saddle effectively against rain and cold.
- > The mini-cape (included in the zipped case) protects shoulders effectively without hampering movements.
- > The skirt wraps around and protects both the saddle and rider's legs. It stays in place at all gaits and when jumping.
- > Safety is ensured by snap fasteners that can be released in the case of a fall.
- > The material used to design the skirt and mini-cape is light and flexible, providing great comfort.
