(patented by Jean-Luc FAUTRAS)*

**> The mobile OMBRELAFOIN® protects
your horses and fodder against the sun
and rain.**

FAUTRAS TUCES

EQUESTRIAN INNOVATOR

ECONOMIC

SAFE

PRACTICAL

Jean-Luc Fautras, after many years in the equine world and having created many innovative designs in horse transportation, has now turned his thoughts to that of the horse's comfort in their paddock.

ECONOMIC

- > The OMBRELAFOIN® replaces a fixed shelter.
- > Avoids horses trampling on their hay and wastage.
- > It reduces the handling and distribution of fodder.
- > It is composed of a grill at the bottom which avoids mould.
- > Up to 8 horses have access to the shelter at the same time.

The foldable shelter is easy to move.

Two doors on each side allow the loading of large bales.

PRACTICAL > The OMBRELAFOIN® rapidly shelters your horses and fodder effectively against inclement weather
It gives 30 m² of shelter and an easily moveable feeder.

The shelter can be deployed in a few seconds as a result of the integrated jacks in the roof.

SAFE > The metallic structure (type Cornadis) opens to the ground avoiding all risks to the horse's limbs.
Horses can feed themselves as they wish.

It is possible to lower the roof on one or more sides to afford protection from the wind or limit access to the rack.

MATERIALS & DESIGN

- > The cage, is composed of five panels of galvanised tubes, allowing the storage of fodder (two of which are locking doors and one being a grilled floor), and a roof structure with hydraulic jacks.
- > A polyester fixed roof.
- > The foldable roof is composed of a heavy duty tarpaulin which protects the area surrounding the feeder.
 - Standard colour: khaki
 - Optional colours: brown, green or white
 - 9mm plastic zip
 - Eyelets, bungee cords and 'S' hooks

CONSTRUCTION: HOME DELIVERY ON A PALETTE - EASY ASSEMBLY

TECHNICAL CHARACTERISTICS

- > Tarpaulin weight: 4.5 kg x 4 = 18 kg
Total weight: 300 kg (cage + tarpaulin)
- > Height beneath tarpaulin: 2.40 m
Overall height: 2.60 m
- > Metallic cage dimensions
Height: 2.40 m
Length: 1.70 m
Width: 1.70 m
- > Unfolded tarpaulin: 6.30 m x 6.30 m
Total tarpaulin coverage: 30 m²
